

Trace the bee trails

This page contains eight tracing puzzles for bees. Each puzzle consists of a bee on the left and a target on the right, connected by a dashed line path. The targets are either a smiling flower or a beehive. The paths are designed with various patterns: a simple curve, a zig-zag, a series of loops, a spiral, and a complex winding path. Small decorative elements like leaves, a rabbit, and a spiral are scattered throughout the page.
